

FormLite

*Perfect homogeneous
profile illumination for interior
and exterior decoration.*

Yachtlite

Brandnew and unique at Yachtlite:

FormLite

Completely lightspot-free illuminating elements, custom made to form. With this unique product YACHTLITE realises pressing requests from shipyards, designers, out-fitters and ship owners: soft and homogeneous interior and exterior illumination.

YACHTLITE FormLites, designed to be almost invisibly fitted, are ideal for shelves, ceiling or mirror borders, stairs and base boards to name just a few.

Distracting and unsightly lightspots, commonly seen with customary LED light tubes, can not be seen with FormLite, either in the light element itself or in any reflecting surfaces.

Any Shape or Colour

FormLites are rigid elements which are custom made to any desired form according to received cut data. The varnished elements are equipped as required with LEDs in warm-white, neutral-white or other popular colours. RGB colour-change is of course also possible.

Technical Data

Minimum Width:	30 mm
Minimum Height:	10 mm
Minimum Length:	100 mm
Maximum Length:	No restrictions
Shape:	No restrictions. Custom-made according to cut file

Price:	On detailed request

Alternative Light Emission

YACHTLITE's FormLites are supplied in two different styles depending on the specific requirement of the illuminating element.

Style A: up or down-illumination elements are ideal for shelves or other furniture pieces for indirect illumination without a visible light element.

Style B: side-illumination allows visible light source, ideal for ceiling or mirror borders among others.
