New China Facility

Tricon Marine, a high-quality builder of FRP/Composite luxury yachts up to 55 m long, has completed construction of China's first and only North American-owned and operated shipyard. Yachts currently under construction have been moved to the new facility, including Tricon's next launch, a 28m long-range offshore performance motoryacht commissioned by an undisclosed Tricon client. The launch will be unveiled during the official shipyard opening ceremony in the spring of 2009. Tricon is helping to lead the charge as China takes center stage in a new era in luxury yachting, one that focuses on excellent quality with superior value. The company's facility in China caters to a discriminating clientele of OEM manufacturers and personal custom yacht clients who demand a world-class luxury yacht with superior investment value.

"With most segments in the shipbuilding industry contracting, and consumers demanding greater value, our timing in offering a solution that addresses these needs and establishes a competitive offering couldn't be better", said Christos Livadas, Chairman and CEO, Tricon Marine. "We intend to put China on the map as a place for world-class yacht construction as never before. Tricon Marine is committed to strictly adhering to client specifications and contractual obligations while offering unmatched craftsmanship at a price that sets a new value standard in the industry."

Marble Letterings

During last years' boot Düsseldorf Yachtlite presented her illuminated letterings with a noble porcelain cover. This luxury class was celebrated at the show when the grey Bandido 'Just 4 Us' displayed her name. These luxurious illuminating covers are an alliance production with Porzellan Manufaktur Nymphenburg, like Yachtlite also a member of 'Deutsche Yachten', and are exclusively manufactured for Yachtlite. During this years' boot Düsseldorf Yachtlite had yet another world premiere. The interior HighLites, back lighted marble letterings, were on display for the first time during the show.

The letterings are realised in cooperation with the Deutsche Yachten members Grama Blend, which create the most wonderful illumination effects.

Simplicity is beauty

Our ships are known for their solidity and traditional beauty. The Delfino 65 is a very nice example of this with her gracious but modest radiation. This seaworthy Trawler offers anything what the most demanding customer can wish. No more and no less.
