Yachtlite

A New Generation of Illuminated Lettering

The name of your yacht is symbolic and should radiantly shine and glow even at night. This is not just a dream.

Illuminating, three-dimensional lettering from Yachtlite gives the name of your yacht the elegant and radiant charisma worthy of her. In the colour of your choice. With the desired facing – coloured, stainless steel, PVD plasma coating or gold leaf. Quality, your yacht has earned!

Yachtlite letters, words and symbols are made from solid acrylic in which light emitting diodes are seawater-tight sealed. Not only the optimal solution but also extremely energy saving and durable.

There is no end of possibilities for the design of your Yachtlite lettering. A multitude of typefaces, colours and surfaces award your yacht name the appropriate character. Six fluorescent colours are at your disposal.

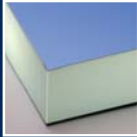

Illuminated Lettering

Prices for 2007.
Fee, VAT and shipping not included.

Seawater proof, durable, easy mounting:

Letters with a coloured foil are delivered with rear threaded holes size M4 and are screwed on through the vessel's side.

Letters with solid metal surfaces are welded with M4 screw sockets. The lettering is delivered with all necessary bolts, washers and screw nuts.

Assembly of a lettering
with stainless steel front:

Together with each lettering we deliver an exact template with the precise positions of the drill holes for the bolts and the electricity supply.

When the drilling is finished, all cables and bolts will fit perfectly.

StairLites FloodLites HighLites

StairLite – One Step Ahead

One of the latest developments at Yachtlite: personalised stairway lighting. A unique way of effectively but discreetly adding a personal touch with a safety value.

Safety on board

The adhesive film front on an illuminated acrylic base can be individually cut.

Whether Shipyard logo, yacht name or the owner's initials Stairlites not only add an exclusive personalisation to your yacht, but also help ensure personal safety on board.

Stairlite Details

- 8 mm acrylic
- LEDs in white, blue, red, green, yellow and orange
- For 12 or 24 Volt on-board supply systems
- High-performance fronting in various colours

Whether stairway or gangboard lighting – the integrated long life LEDs safeguard the path for the future.

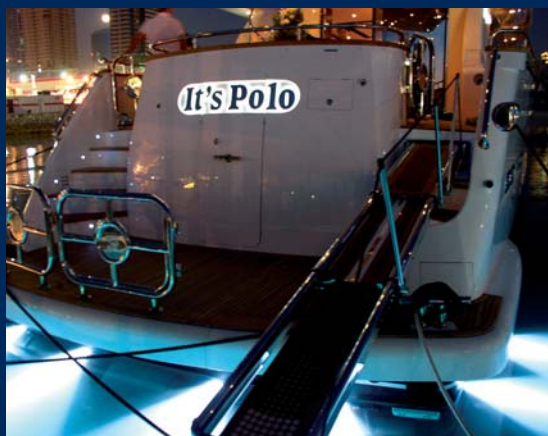

FloodLite – Underwater Illumination

Underwater floodlights complete Yachtlite's extensive product palette for yachts.

Yachtlite provides underwater floodlights with certification from longstanding reputable manufacturers.

Floodlite types:

- Halogen
- Xenon
- LED
- HIT / HQI / HSD

Even under water everything is brought to light!

HighLites

In close cooperation with shipyards, constructors and yacht designers Yachtlite's team can realise every conceivable special request and, it goes without saying, that top quality and exclusive workmanship is guaranteed.

Find more Highlites such as RGB-colour change or PVD plasma coating at www.yachtlite.com.

For **curved hulls** the rear side of the characters can be accommodated to the curvature of the ship, to enable perfect fixation without any spacers.

Add even more elegance to your lettering or a more harmonic fit to the hull of your yacht with **bevelled borders**.

A style which also increases the LED light emission.

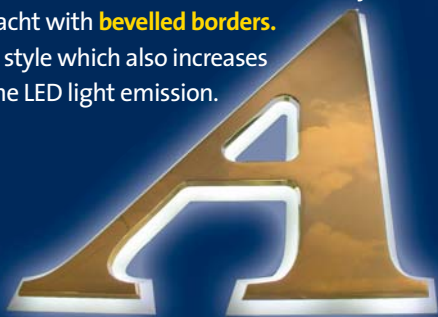

Yachtlite's newest exclusive product – your yacht lettering with a **porcelain cover** adding an extra touch of nobility.

Yacht names are not the only reason to use Yachtlite lettering:

illuminating door or guidance signs

ensure clarity day and night.

Design-Generator on the Internet

At www.yachtlite.com you can judge firsthand and try out a variety of colours, fonts and surfaces in all available options and test the night and day effect.

If you are happy with the result simply enter the quantity and size of your

required lettering and issue a request to Yachtlite with a few clicks.

Alternatively, send your own ideas and photos to Yachtlite and further individual suggestions per photomontage will be made especially.
