

Yachtlite Enlightening Innovation in Positive Light

Three new products entered the YACHTLITE product palette simultaneously:

FormLite

Ready for the six-year brand anniversary, in 2008 YACHTLITE introduced the new "FormLite" line: light-spot free LED illuminating elements for furniture, ceiling recesses and outdoor fixtures.

The FormLite elements can be manufactured according to CAD-data to perfectly fit every form. They are optionally equipped with LEDs in neutral-white, warm-white or other established colours. Naturally a RGB colour change control is also possible.

The result is a soft, homogeneous illumination without any visible LEDs or reflecting light spots. With FormLite direct or indirect interio- or exterior illumination is achieved, custom-made by YACHTLITE.

Undesirable spot reflections in glossy surfaces are reliably avoided. Herewith YACHTLITE meets the requirements frequently expressed by designers, outfitters and owners, who yearned for the end of the light tube era. The first projects have already been world wide processed.

StairLite

The current new development, already a secret "HighLite", is the stair lights with individual logo. The "StairLites" offer a discreet CI placement on the one hand, and an eye-catching noble self-presentation with practical worthiness on the other hand.

They are perfectly suited as reliable stairway, gangboard, cockpit and floor room illumination since placement is bountiful. To eliminate every risk of injury, YACHTLITE has chosen an oval standard format (90 x 50 x ca. 8 mm) with bevelled edges. Special forms and neutral surfaces are of course possible at any time.

A further distinctiveness is the simple mounting. The StairLites are available in small series from 10 articles with owner's initials or in larger quantities for series yachts with shipyard logo or ship's name, optionally with surface lamination or stainless steel.

YACHTLITEs with Porcelain Covers from Porzellan Manufaktur Nymphenburg

"Co-Branding with Winners" could be the motto here: in cooperation with the Deutsche Yachten member, Porzellan Manufaktur Nymphenburg, the first illuminating porcelain lettering: "Just4Us" on the Bandido 75' from Drettmann, was presented at the Boot 2008 in Düsseldorf in a world premier.

In the meantime several requests for further porcelain YachtLites are in assignment and processing. The customers can be found under those who love specialities and exclusive luxuries.

Further co-productions with other Deutsche Yachten members in 2008: Birgit Schnaase Interior Design (lettering "Scenic Emerald"), Reiner GEHR Yacht and Aircraft Interior (interior illumination), Abeking & Rasmussen and Dahm International.

Yachtlite Einleuchtende Ideen mit Perfektion

Seit 2002 setzt das Team um YACHTLITE Trends mit Aufsehen erregenden beleuchteten Schriftzügen, Logos und Objekten. Ein Geheimnis der perfekten Ausleuchtung ist die raffinierte Lichttechnik. In hochwertigem Acryl werden LEDs und Technik stoß- und wasserfest, wind- und UV-beständig versiegelt – unsichtbar und per Handarbeit.

Jedes Yachtlite ist ein Unikat und würdigt in seiner Einzigartigkeit Yacht, Werft und Eigner.

Qualität, Individualität und Exklusivität

Zuverlässige Technik sowie langjährige Erfahrung in Präsentations- und Lichttechnik bilden die Basis. Die homogene Ausleuchtung wird erzielt durch individuelle Lichtberechnung, durch hochwertige Verarbeitung aller Materialien sowie durch Handarbeit kombiniert mit CNC-gestützter Produktion.

Sonderlösungen

Der Sonderwunsch ist bei YACHTLITE bereits der Standard. Rückwärtige Anpassungen an vertikale und horizontale Wölbungen, Sonderzeichen (z.B. japanisch, arabisch) oder individuell erarbeitete Befestigungslösungen sind ebenso Alltag wie edle PVD-Beschichtungen und leuchtenden Umsetzungen von Logos, Signets und Bildern. Lichtfarbsteuerungen und deren Integration in bestehende Systeme auf neuestem Stand sind lieferbar - auf Wunsch per Fernbedienung.

Product Range

YACHTLITE lässt alles erstrahlen: klassisch hinterleuchtete Schriftzüge, frontseitig leuchtende Objekte, verschiedene Acryle in vielen Formen und Farben. Alle Wünsche sind umsetzbar, in den gängigen LED-Farben sowie auch mit RGB-Farbwechsel. Leuchtende Produkte wie die Stufenbeleuchtung „StairLite“, die individuelle Objektbeleuchtung „FormLite“, Unterwasserscheinwerfer und unbeleuchtete Schriftzüge runden die Palette ab.

Service

Basis des YACHTLITE-Teams ist ein zentrales kreatives Projektbüro, das eine zugewandte individuelle Betreuung aus einer Hand bietet. Design und Umsetzung, Visualisierung und Simulation, Beratung, Aufmass und schließlich die Montage vor Ort sind Standards. Eine kontinuierliche Qualitätskontrolle sichert Perfektion und Kundenzufriedenheit. Dahinter steht ein breites Netz an zuverlässigen Zulieferern und Partnern weltweit.

Materialien

Die LED-Basis des Schriftzugs wird je nach Anforderung oberflächenseits veredelt mit hochwertigstem Edelstahl in allen gewünschten Materialstärken, mit Ganz- oder Teillackierungen im Yacht-Standard, Qualitäts-Acrylen, Blattgold, Hochleistungsfolien, Edelhölzern oder luxuriösen Porzellanhauben.

Aquamarina am Tag und in der Nacht

Aquamarina by day and night

Frontleuchtende Elemente – gleichmäßige Ausleuchtung, keine sichtbaren LEDs
Front illuminating elements - smooth illumination with no visible LEDs

Kombination von Name und Logo als Designarbeit
Combination of name and logo as design craftsmanship

Spitzenqualität: Für diesen Schriftzug wurde die Wölbung des Bootsrumpfes mit einem 3D-Laser exakt vermessen

Prime quality: for this lettering the hull curvature was precisely measured with a 3-D laser

Designlösung: teillackiert im original Yachtlack mit eingelassener Edelstahlfront

Design solution: partially lacquered in original yacht lacquer with embedded stainless steel front

Sonderlösung für filigrane Buchstaben: teillackiert zur optimalen Lichtemission, aufgesetzte Edelstahlfront

Special solution for filigree letters: partially lacquered for optimum light emission, fitted stainless steel front

Yachtlite Enlightening Ideas with Perfection

Since 2002 the team from YACHTLITE have set trends with attention provoking illuminating letterings, logos and objects. One secret of the perfect illumination is the ingenious light technique. LEDs and technology are sealed shockproof, watertight, wind and UV resistant in high quality acrylic – invisibly and by hand.

Each Yachtlite is unique and it's this uniqueness that honours yacht, shipyard and owner.

Quality, Individuality and Exclusivity

Reliable technology as well as many years' experience in presentations and light technique forms the basis. The homogeneous illumination is achieved by individual evaluation, by first-class workmanship of all materials and by handwork combined with CNC supported production.

Speciality Solutions

Special requests are already the norm at YACHTLITE. Rear side adaptation on horizontal and vertical hull curvature, special characters (e.g. Japanese, Arabic) or individually developed mounting solutions all belong to everyday life, along with noble PVD-coating, the illuminating realisation of logos, signs and illustrations. Light and colour control and its integration in existing systems are now also deliverable – on request with remote control.

Product Range

YACHTLITE lets everything shine: classic rear lit lettering, front illuminating objects, various acrylics in many forms and colours. Every request is realisable in the established colours and with RGB colour change. Illuminating products such as the stair illumination "StairLites", the individual object illumination "FormLite", floodlights and unlit lettering round off the wide palette.

Service

The YACHTLITE team's base is a central, creative project office, which offers personal and individual support from a single source. Design and realisation, visualising and simulation, advice, measurements and, ultimately, assembly at location are standard. Continuous quality control guarantees perfection and customer satisfaction. For this purpose YACHTLITE works in close cooperation with a worldwide network of reliable suppliers and partners.

Materials

Depending on the surface specifications, the LED basis of the letterings are finished with the highest quality stainless steel in all requested material thicknesses, either with full or partial lacquering in yacht standard, quality acrylic, gold leaf, high performance film, precious wood or luxurious porcelain covers.
