

Yachtlite

With five completely different letterings the Yachtlite specialists yet again proved their fine quality products at the last Monaco Yacht Show. The five superyachts not only glowed during daylight hours with mirror-like stainless steel, but also shone radiantly by night exceptionally homogeneously and reliably. One secret lies in the top quality acrylic, in which the individually calculated illumination level is securely sealed. Neither the single LEDs nor the fixations are visible whether daylight or dark. For this year's METS in Amsterdam the presentation of LED illuminated elements for furniture and exteriors is planned – again without visible light spots! A reason to look forward to the darker seasons after all... You can find Yachtlite on Stand 05.413.
