FAST CHANGING BUSINESS

## Spectacularly Luminous New Year

"Big Fish" in order to coordinate the colour shades of the lettering, is for some still inconceivable. In the meantime even more complex networked illumination solutions are in demand, such as the homogeneous dimming of complete decks with one central light control. This can allow complete decks to be synchronously illuminated, as well as individual decks to be suffused with different lighting. The magical element here is the consistent light colour, with which anything is possible. Hence, at YACHTLITE more and more complex projects are handled under one roof: treadable inlays in teak floors, jacuzzis or pools, homogeneous illuminating surfaces on ceilings and walls, on furniture, as lettering or logo – all for exterior as well as interior use.

For YACHTLITE, 2011 was a creative year of advancement and optimization, especially with the individual product lines FormLite, RoomLite and FloorLite. Designers, shipyards, equipment suppliers and project managers are all convinced by the technical capabilities and superior quality. The imagination, thanks to evolving technology, is virtually unlimited.

Numerous spectacular inquiries and customer requests have been implemented into contracts, including large and even larger FloorLite projects. Therefore YACHTLITE commences into a luminous 2012 with positive perspectives.

The fact that, for nearly two years YACHTLITE has only needed an Internet connection to the yacht
