high-tech customized products against very competitive prices and short delivery times. For the highly demanding owners and captains of yachts, low levels of noise and vibrations are a must. **Van Voorden** propellers meet the requirements through a design system with full analysis on cavitation behaviour and high accuracy finishing up to class-S.

VMS Door Solutions produces high quality automatic door systems for yachts. Weathertight approved by Lloyd's, DNV, ABS. Silent operation and worldwide service. Many well-known yachtbuilders in the Netherlands use the ease of VMS. The company can do the engineering, production, delivery, installation and commissioning themselves. Also other shipyards, in- and outside Europe, allow VMS to name them in the list of references. Every system

is custom made and built in aluminium, stainless steel 316 AISI or wood. VMS is also able to create door systems with special measures. Horizontal and vertical curvature with a radius of maximum 900 mm is possible. **VMS Door Solutions** can offer a good service and fair prices.

Three prestigious products in this summer alone emphasize the prominent market position enjoyed by **Yachtlite**, the exclusive manufacturer of superior yacht letterings and illumination elements. Name letterings were supplied by Yachtlite to three major German shipyards for three brand new yachts totalling 360 m in length, two of which are super yachts, each over 100 m in length. Ship names and owners remain strictly confidential as usual, but it is once again proven that the high-class workmanship of the German quality provider Yachtlite has become

a regular fixture when it comes to top class international productions.

Yachtglass is a young and dynamic company that combines the latest technologies with the expertise from Hero-Glas, its mother company. Hero-Glas is one of the largest privately owned glass manufacturers. Yachtglass is located in Dersum, Germany, only a few miles from the Dutch border. The company is always two steps ahead of the competition, due to the fact that they make it their daily challenge to create changes and adjustments to their products, providing them with a new dimension of performance.
