PASSION FOR YACHTING

Yachtlite's FormLite and RoomLite products are increasingly used in interiors. CNC-controlled equipment allows for customisation and complex lighting control techniques enable more and more perfected light displays. FloorLites are homogeneous light inlays for teak decks or steps. These treatable front-lighting elements, with a special surface layer are levelly embedded into the flooring and can even be sanded for later refits, together with the teak, in one process. Since July 2010 **Yachtlite** supplies the Ocean Vision underwater lights by VDO, a brand of Continental Corporation, exclusively for Germany. This professional lighting technology is derived from the automotive industry, and integrated into the appropriate housing.
