Yacht

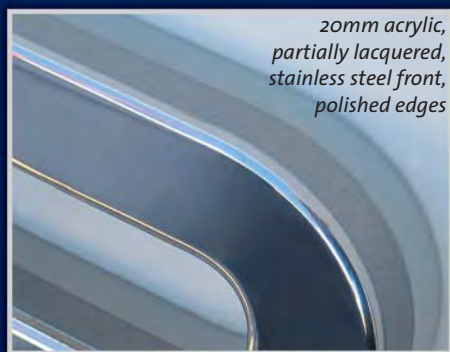

Unequalled Quality in Illuminated Lettering

The name of your yacht is symbolic and should radiantly shine and glow even at night. This is not just a dream.

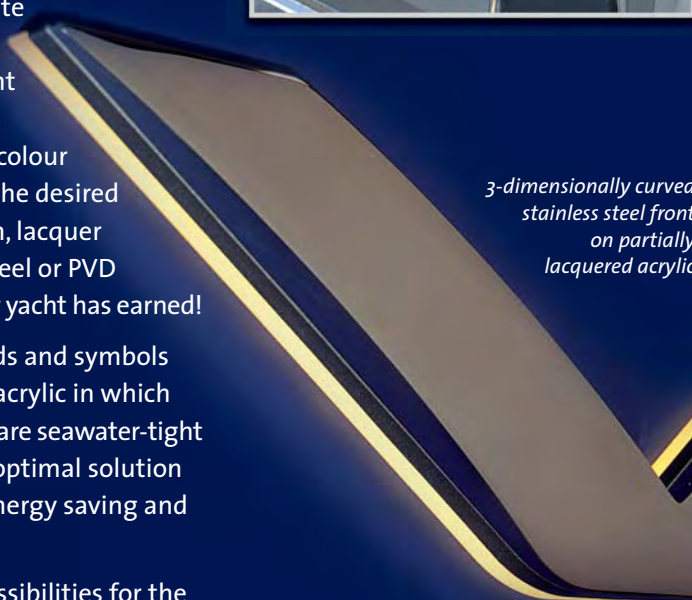

Illuminating, three-dimensional lettering from Yachtlite gives the name of your yacht the elegant and radiant charisma worthy of her. In the colour of your choice. With the desired facing – coloured film, lacquer or acrylic, stainless steel or PVD coatings. Quality, your yacht has earned!

Yachtlite letters, words and symbols are made from solid acrylic in which light emitting diodes are seawater-tight sealed. Not only the optimal solution but also extremely energy saving and durable.

There is no end of possibilities for the design of your Yachtlite lettering. A multitude of typefaces, colours and surfaces award your yacht name the

20mm acrylic,
partially lacquered,
stainless steel front,
polished edges

3-dimensionally curved

on partially
lacquered acrylic

appropriate character. Seven fluorescent colours and RGB colour change are at your disposal.

RGB colour change

FloorLite StairLite FormLite RoomLite

FloorLite

Homogeneous light inlays for teak decks or steps

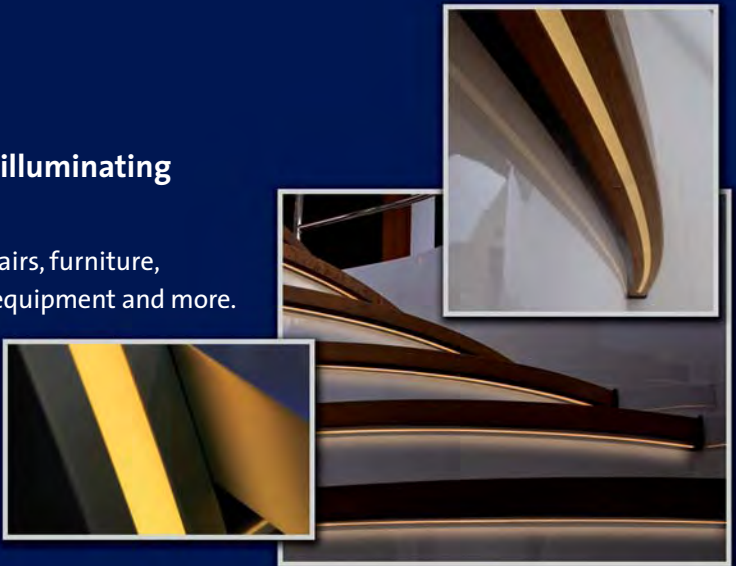

These treadable elements, made with a special front surface, are levelly embedded into the flooring and can even be sanded for later refits in one process together with the teak.

FormLite

Homogeneous illuminating elements

Illumination for stairs, furniture, recesses, outdoor equipment and more.

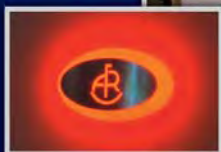

StairLite

Safety on board

Whether stairway or gangboard lighting – the integrated long life LEDs safeguard the path for the future.

- Size: 90 x 50 x 10 mm
- LEDs in white, blue, red, green, yellow and orange
- For 12 or 24 Volt on-board supply systems
- High-performance surfaces with coloured film or stainless steel frontings
- Front design custom made

HighLites – Specialities created by Yachtlite

In close cooperation with shipyards, constructors and yacht designers Yachtlite's team can realise every conceivable special request and, it goes without saying, that top quality and exclusive workmanship is guaranteed.

Find more HighLites such as RGB-colour change or PVD plasma coating at www.yachtlite.com.

Especially designed and exceptional **logos and symbols** in any possible form and lighting variances.

Illuminated Shower Wall, 100% waterproof and airtight, light-spot free. Available in any form, size and colour.

Unequaled and unique **front illuminated systems** for eye-catching and amazing optics and effects.
