Creative Light Design

YAGITE

No Light Like YACHTLITE

Each Yacht name is unique - therefore it should be projected in a vibrant light with the highest quality materials and design.

YACHTLITE letterings are highly individual and guarantee the greatest show effect, especially at night: when the elements radiate in all possible colours and shapes.

The complete YACHTLITE product range includes far more than the spectacular letterings. With YACHTLITE products you can place key enhance-

ments everywhere on board. Effectively showcase stairways with StairLite or enhance elegant contours with FormLite. Create individual inlays with FloorLite and bring variable feel-good moods to entire areas with RoomLite.

Any manner of unusual customer requests will be created into innovative solutions with German perfection.

Our global customers' high level of satisfaction confirms again and again: "There's no light like YACHTLITE".

FloorLite HeliLite
FormLite FrontLite

HeliLite

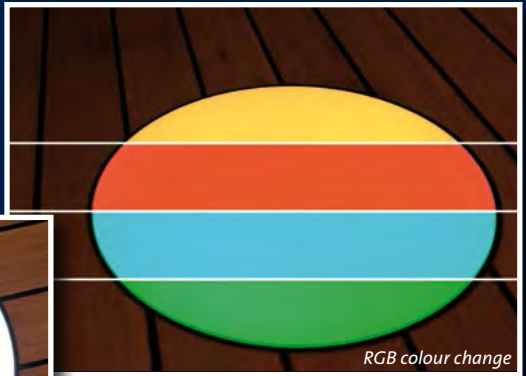

Custom-made illuminating deck elements for certified commercial helipads

VianreggioSuperYachts

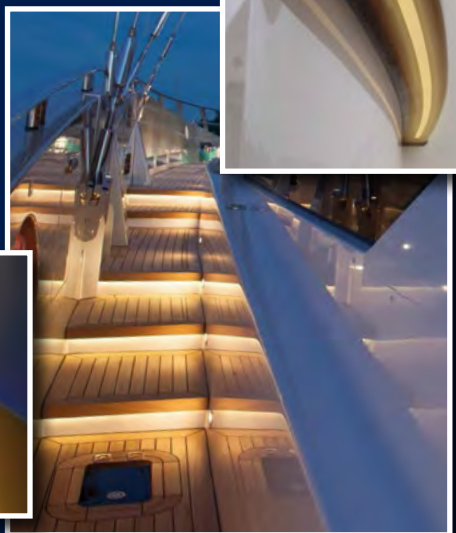

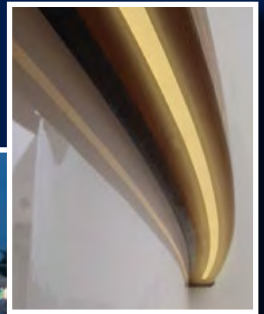

FloorLite

HighLites – Specialities created by Yachtlite

In close cooperation with shipyards, constructors and yacht designers Yachtlite's team can realise every conceivable special request and, it goes without saying, that top quality and exclusive workmanship is guaranteed.

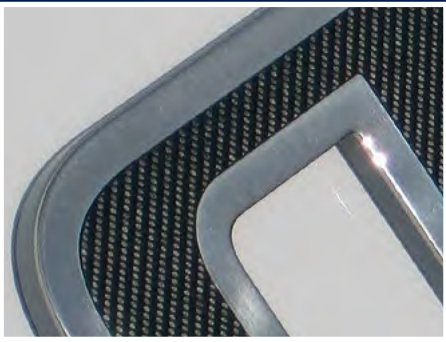

Find more HighLites such as RGB colour change or PVD plasma coating at www.yachtlite.com. Alternatively, send your own ideas and photos to Yachtlite and further individual suggestions will be made especially for you.

3-dimensionally produced **FrontLite** elements, light emission through front

Especially designed and exceptional **logos and symbols** in any possible form

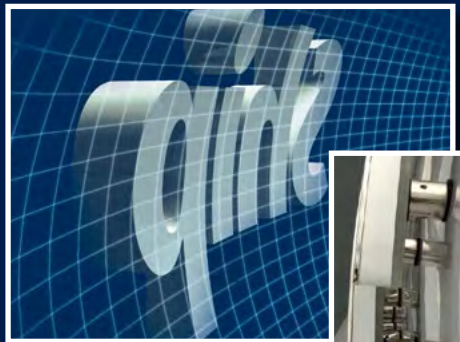

Carbon Fibre surfaces with stainless steel frame

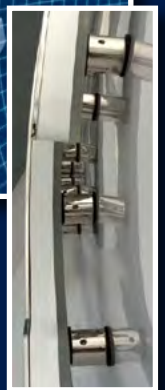

3-dimensionally curved stainless steel front on partially lacquered acrylic

Custom made **stainless steel solutions** in all thicknesses, PVD coatings, guildings, bicolour and varieties

Curved hulls are measured with 3-D lasers and characters are manufactured accordingly for perfect fixation

Illuminated Letterings Product Lines

Product Lines

ClassicLine

- Vinyl film front

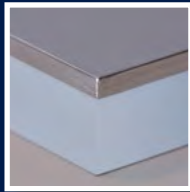

ClassicLine CF

- 10 mm satined acrylic
- 3 mm carbon fibre front (film surface in CF optics also possible)

CustomLine

- 10 mm satined acrylic
- 3 mm mirror quality stainless steel front

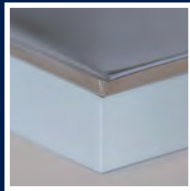

ClassicLine Acrylic

- 10 mm satined acrylic
- 3 mm acrylic front

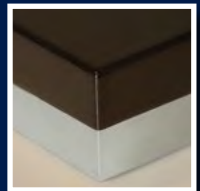

CustomLine Plus

- 10 mm satined acrylic
- 3 mm mirror quality stainless steel front
- Polished edges for higher light reflection

ClassicLine Lacquer

- 20 mm satined acrylic
- 10 mm partially lacquered

All letterings are available in seven different light colours or RGB colour change (12, 24, 110 or 230 Volt). All materials can be delivered in other thicknesses.

Seawater proof, durable, easy mounting:

Letters with a coloured film or a lacquered surface are delivered with rear threaded holes size M4 and are screwed on through the vessel's side.

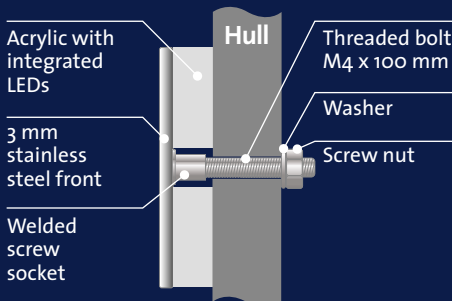

Letters with solid metal surfaces are welded with M4 screw sockets. The lettering is delivered with all necessary bolts, washers and screw nuts.

Alternative assembly systems are available on request.

Together with each lettering we deliver an exact template with the precise positions of the drill holes for the bolts and the electricity supply.

Assembly of a lettering
with stainless steel front:

When the drilling is finished, all cables and bolts will fit perfectly.
