Individual Lighting Solutions for Your Yacht

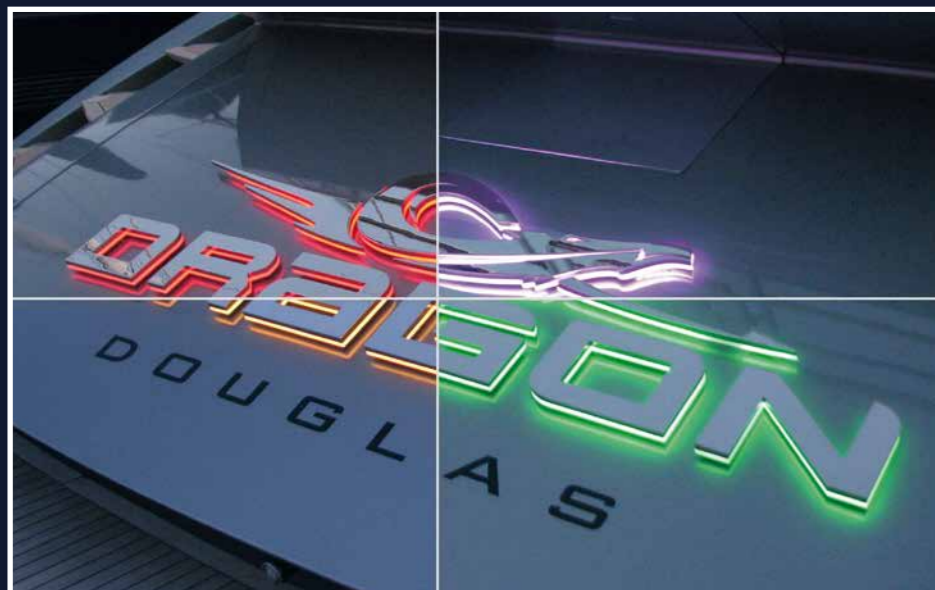

YACHTLITE represents perfect LED lighting.

Since 2002, YACHTLITE has been constantly setting new trends and standards for perfect LED systems and homogeneous, spot-free illumination for yachts of all kinds.

In addition to lettering and logos, YACHTLITE's team of experts develops optimal solutions for unprecedented creations.

German Engineering: All around the world, discerning owners, designers, constructors, shipyards and shipping companies rely on YACHTLITE's unique competence and many years of experience in project planning, conception, programming and implementation of tailor-made lighting designs and logo designs.

The global customers' high level of satisfaction confirms again and again: "There's no light like YACHTLITE".

Product Lines

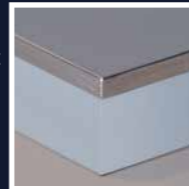

ClassicLine

- 10 mm satined acrylic
- Vinyl film front

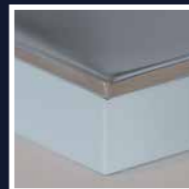

CustomLine

- 10 mm satined acrylic
- 3 mm mirror quality stainless steel front

CustomLine Plus

- 10 mm satined acrylic
- 3 mm mirror quality stainless steel front
- Polished edges for higher light reflection

ClassicLine CF

- 10 mm satined acrylic
- 3 mm carbon fibre front (film surface in CF optics also possible)

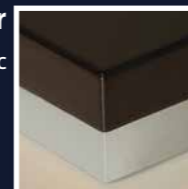

ClassicLine Acrylic

- 10 mm satined acrylic
- 3 mm acrylic front

ClassicLine Lacquer

- 20 mm satined acrylic
- 10 mm partially lacquered

All letterings are available in seven different light colours or RGB variable colour (12, 24, 110 or 230 Volt). All materials can be delivered in other thicknesses.

Seawater-proof, durable, easy mounting:

Letters with a coloured film or a lacquered surface are delivered with rear threaded holes size M4 and are screwed on through the vessel's side.

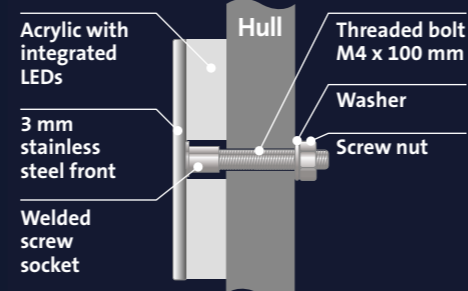

Letters with solid metal surfaces are welded with M4 screw sockets. The lettering is delivered with all necessary bolts, washers and screw nuts.

Alternative assembly systems are available on request.

Together with each lettering we deliver an exact template with the precise positions of the drill holes for the bolts and the electricity supply.

Assembly of a lettering with stainless steel front:

When the drilling is finished, all cables and bolts will fit perfectly.
